GROUP DISCUSSION AND CONCEPT

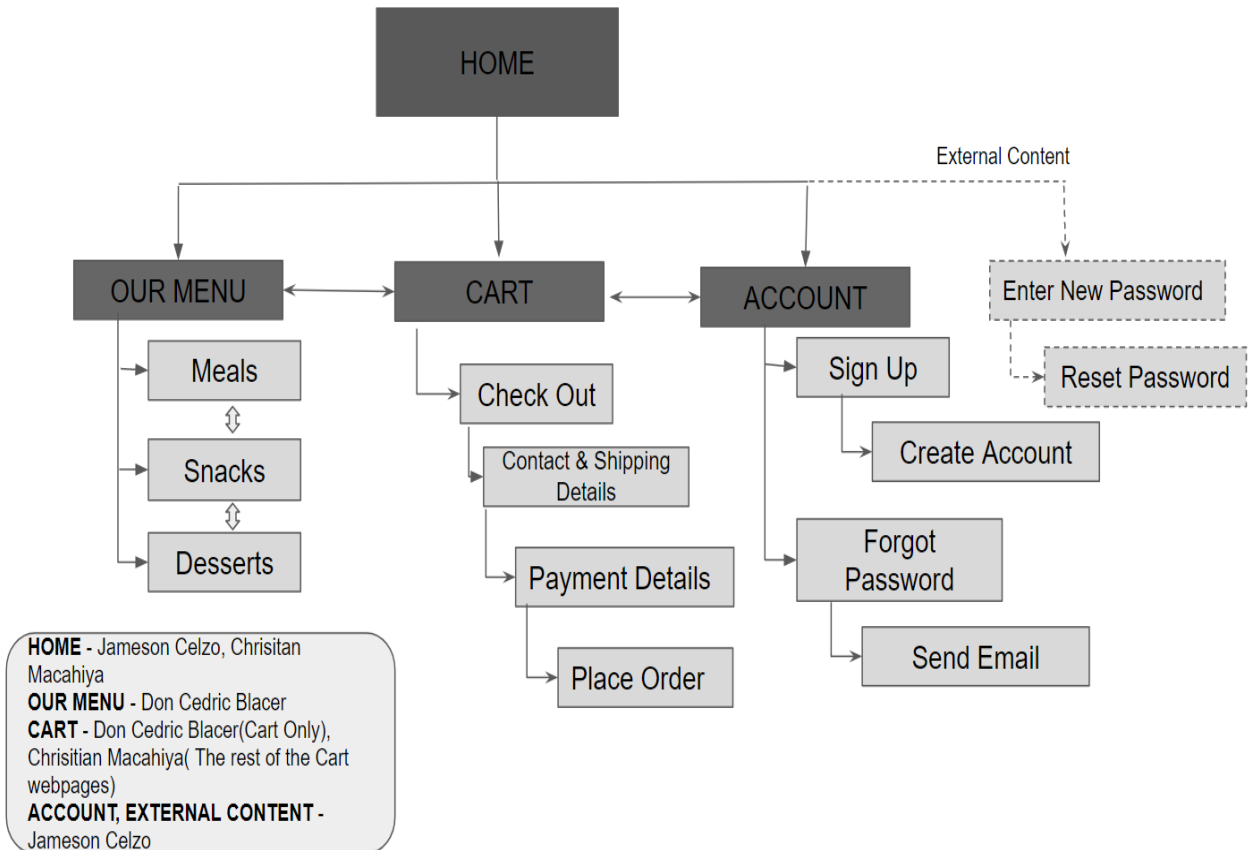

Nowadays, Online shopping has been very popular especially in this pandemic. One very good reason is that online shopping is very convenient since you only have to do a few clicks and the product will be on your doorstep. Another reason is that the Physical Local Shops only have a limited capacity limiting the customers' numbers. Since this is the trend nowadays, we plan to make a website application circling around an online Shop. We decided that the online web application will be themed on foods.

We decided to go with Foods as the main theme of the online Web Application since food is the number one Essential Goods in the general market. The food category will have 3 main categories; Meals, Desserts and Snacks. We wanted to make this web application accessible for everyone regardless of age and even those people who aren't very familiar with technologies. So we decided to keep the design of the web app as simple as possible and very complicated to assure a user friendly application. The Business Name will be "SimplyTasty" highlighting the simplicity and the tasty foods that we offer.

Key Takeaways

- Online Food Shop
- Very Simplistic Web Design

ABOUT US

Simply Tasty's beginnings started in 2022 after the ongoing pandemic subsided low enough where bussiness can operate, we decided to open our own food bussiness. The Restaurant started serving mixed foods you can find in different cultures. In hopes of being proficient and honing the different kinds of skills that are involve in the process of creating the cuisine
